## Forward-Looking Statements

This presentation contains forward-looking statements, including guidance for fiscal years 2025 and beyond, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are based on Limoneira's current expectations about future events and can be identified by terms such as "could," "expect," "may," "anticipate," "outlook," "plans," "intend," "should," "will," "likely," "strive," and similar expressions referring to future periods.

Limoneira believes the expectations reflected in the forward-looking statements are reasonable but cannot guarantee future results, level of activity, performance or achievements. Actual results may differ materially from those expressed or implied in the forward-looking statements. Therefore, Limoneira cautions you against relying on any of these forward-looking statements. Factors that may cause future outcomes to differ materially from those foreseen in forward-looking statements include, but are not limited to: success in executing the Company's business plans and strategies, including the merger of the Company's citrus sales and marketing into Sunkist Growers and managing the risks involved in the foregoing; the ability of the merger to improve efficiency and reduce cost; changes in laws, regulations, rules, quotas, tariffs and import laws; weather conditions that affect production, transportation, storage, import and export of fresh product; increased pressure from crop disease, insects and other pests; disruption of water supplies or changes in water allocations; disruption in the global supply chain; pricing and supply of raw materials and products; market responses to industry volume pressures; pricing and supply of energy; changes in interest and currency exchange rates and the impact of inflation; availability of financing for land development activities; general economic conditions for residential and commercial real estate development; political changes and economic crises; international conflict; acts of terrorism; labor disruptions, strikes or work stoppages; loss of important intellectual property rights; inability to pay debt obligations; ability to maintain compliance with debt covenants under our loan agreement; government restrictions on land use; and market and pricing risks due to concentrated ownership of stock. Other risks and uncertainties include those that are described in Limoneira's SEC filings which are available on the SEC's website at <http://www.sec.gov>. Limoneira undertakes no obligation to subsequently update or revise the forward-looking statements made in this presentation, except as required by law.

## Non-GAAP Financial Measures

Due to significant depreciable assets associated with the nature of the Company's operations and interest costs associated with its capital structure, management believes that earnings before interest, income taxes, depreciation and amortization ("EBITDA") and adjusted EBITDA, which excludes stock-based compensation, gain (loss) on disposal of assets, net, and severance benefits are important measures to evaluate the Company's results of operations between periods on a more comparable basis. Such measurements are not prepared in accordance with U.S. generally accepted accounting principles ("GAAP") and should not be construed as an alternative to reported results determined in accordance with GAAP. The non-GAAP information provided is unique to the Company and may not be consistent with methodologies used by other companies. EBITDA and adjusted EBITDA are summarized and reconciled to net (loss) income attributable to Limoneira Company, which management considers to be the most directly comparable financial measure calculated and presented in accordance with GAAP.

# ORGANIC RECYCLING: STRATEGIC PARTNERSHIP DRIVING VALUE

LIMONEIRA<sup>®</sup>  
SINCE 1893

Agromin develops strategic partnerships with agriculture to design, build, and operate organics compost centers to help communities meet mandates set by the State of CA to reduce greenhouse emissions at landfills.

Agromin develops a sustainable collaboration of companies to divert organics from landfills and produce organic rich compost to create healthy solids while reducing greenhouse gas emissions, decarbonize agriculture and drawing down carbon from the atmosphere.
